

# Europaschool

We are a primary school located in the district Kolderbos Genk. We have a year group system for children from 2.5 till 12 year.

Our priority aim is 'feeling good at school'. A child that feels good, likes to come to school, learns more, act better. We want that every child gets the optimal opportunity to pass his/here school career with success.

Therefore, beside the regular curriculum, we offer a lot more.

Starting from the pre school:

- a teacher who speaks also Turkish: feeling save.
- Snoezel class: to relax, learning to take care of each other.
- Second teacher in the class to support more
- Differentiation to learn on your own level
- Listening project (Tomatis) to raise the concentration
- Art projects
- Philosophize: to express your feelings and learn to look critical to the world.

To be successful, we need the support of the parents. Therefore we have a lot of project with parents to support them to be interactive with their children:

- school-we: on Wednesday afternoon parents and children (between 2 and 5) come to school and play, leading by a pre-school teacher.
  - 'Circus Kiekeboe': parents get books and DVD's from school to read and look, together, at the video.
- Meetings in the morning with coffee and cake
- 'Overstap': parents get materials from us to do homework with the children
- Info day's to exchange information.
- Open day's in the class: a small group of parents come to the class and following the lessons. After hood the get the opportunity to speak with the teacher about their experience.
- Individual parents meetings to talk about the result of their children

We believe that it takes a whole city to raise a child. Therefore the school wants to be a place were every partner can meet, participate and support each other. School, parents **and** organisations of the neighbourhood (CLB, CEP, open school, youth organisation, centre for supporting parents who have problem with the upbringing of their children, healthcare centre for parents with babies,...) support each other in the project 'Koldertof'. Aim: to make the neighbourhood a nice place to be and raise the solidarity between each other.
