We started talking about the projects results. And Tony has the common raport with himself. We decided that we will do the final raport as soon as possible. And we also thought that we have reached our project aims and goals. We agreed that all the visits had been inspiring and instructive.

In Kuopio we visited a lot varios places where we do the immigrant work with people. We visited the schools, Kuopio community college, social office, Kuopio refugee unit, Savo vocational college/immigrants education and the multiculture center "Kompassi".

We discussed about the results of our project. Everybody has his own calendar that was made very nicely and we had these themas for every month 1. Respect 2. Dialogue3. Patience 4. Motivation 5. Tolenrance 6. Solidarity 7. Co-operation 8. Empathy9. To be consequent 10. Kvality 11. Sense of humour and 12. To be a roul model.

These words were the keywords to comment in our P.A.C.T. calendar.

The visit in Kuopio/Finland was very well planned and we learned a lot about the Finish school system and the work that is made with the immigrants and the workers.

We also learned a lot about the immigrant work and that the important thing is that we respect the people as a human being and that we approve the persons themshelves. And so we can start to work with the emigrants.

This was the last meeting of this project. Now we have done a lot of co-operation network and it is time to say goodbuy to all participate countries and thank you for good work for this project!
